DETAILED ACTION

This Office Action is in response to the amendment filed December 18, 2003 for the above identified patent application.

Drawings

1. The drawings were received on December 18, 2003. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Mabuchi et al. (US Patent 4,022,074).

Mabuchi et al. discloses a molded gear having teeth formed around an outer periphery, a hub, a web, radially extending rib portions, and blades, wherein an end of each blade is formed on the extension of a corresponding diametrical rib at a position on a side surface of the gear. The method limitation of forming the gear "by injection molding" has been given little weight in an apparatus claim.

Response to Arguments

4. Applicant's arguments filed December 18, 2003 have been fully considered but they are not persuasive. The prior art to Mabuchi et al. clearly illustrates each and every limitation of the claims. Further, Mabuchi et al. illustrates the end of the surface (front) side or the blades that are inclined is located on an extension of the corresponding diametrical rib, and from this end, the blade is shaped so as to extend obliquely in the direction toward the back surface.
